Sindhura Kumbakonam Subramanian

352-810-0089 | sindhu.ss10@gmail.com | LinkedIn | GitHub | Portfolio

Education

University of Florida — Gainesville, FL
Master of Science in Computer Science — *Aug 2024 – May 2026*

Sri Venkateswara College of Engineering — Chennai, India
Bachelor of Engineering in Computer Science and Engineering — *Aug 2016 – May 2020*

Technical Skills

Languages: Python, Java, Javascript, Go
Frontend and Backend Frameworks: Spring Boot, Hibernate, React, Express, Transact T24
AI/ ML: HuggingFace, spaCy, PyTorch, LangChain, LangGraph, OpenAI, Llama, Claude, RAG, Prompt Engineering
DevOps: Docker, AWS, Git, Kubernetes
Data: PostgreSQL, MongoDB, MySQL, SQLite, DuckDB
Tools: Curl, Postman, Apache Kafka, FastAPI

Experience

UF WiCSE (Women in Computer Science and Engineering) |UF ACM-W — Jan 2026 – Apr 2026
Software Engineer Apprentice — *Gainesville, Florida*

- Built Spring Boot microservices backed by a PostgreSQL database to explain log messages, identify their first occurrence, integrating OpenAI, Claude, and Llama APIs for automated log analysis; added retry mechanism for API overload failures to improve resilience
- Implemented LLM-as-a-Judge to evaluate responses on correctness, completeness, clarity, and answer relevance, improving response quality to 90–95% for clarity/relevance and 85–90% for correctness/completeness

Trustworthy Engineered Autonomy Lab — Aug 2025 – Apr 2026
Graduate Research Assistant — *Gainesville, Florida*

- Leveraged Hugging Face transformers and LLMs to enhance model reasoning through Chain of Thought prompting, improving performance via self-consistency across multiple sampled reasoning paths
- Co-authored "Confidence over Time: Confidence Calibration with Temporal Logic for Large Language Model Reasoning," accepted to Findings of ACL 2026

Temenos — Nov 2021 – July 2024
Associate Product Engineer — *Chennai, India*

- Built scalable backend solutions for asset lease lifecycle, bill generation, payment processing and settlement; automating recurring bill schedules across 2000+ active arrangement contracts with time-triggered payment workflows
- Delivered high-performance code with 95% test coverage, resulting in consistently low production defect rates and minimal need for post-release hotfixes across core asset-finance workflows
- Collaborated in agile environment, participating in sprint planning, daily stand-ups, code reviews, and iterative feature delivery
- Resolved client and production defects with low MTTR; ensuring 100% on-time release delivery

Cognizant — Nov 2020 – Nov 2021
Programmer Analyst — *Chennai, India*

- Developed a custom UI feature for displaying purchase order discrepancies, enhancing visibility and decision-making using SAP tools

Projects

Reddit Clone | *Go, Protoactor, Git, Protobuf* — Nov 2024 – Dec 2024

- Developed a reddit simulator with account registration, subreddit management, posting, commenting, voting, and messaging functionalities - simulated up to 5000 concurrent actors with a 1.26x parallelism ratio
- GitHub repo

StartupNexus | *React, Next.js, Go* — Jan 2025 – Apr 2025

- Built a responsive web app for startup collaboration, including user feeds, profiles, and post CRUD
- GitHub repo
